

Introduction

We are a privately owned, family run contracting business established in 1982.

We are located within easy access of the region's trunk roads. We possess our own plant and equipment, specialise in drainage schemes with associated ground works and can undertake other similar civil engineering projects, as outlined below:

- Main drainage, storm and sewer systems
- Earthworks
- Concrete foundation works, pavements and finishing
- Infrastructure works
- Excavations
- Site clearance

If required we are willing to include the supply of permanent materials within our scope of work. Contract types have included BOQ's, Lump Sums and Fixed Price.

Operational Area

We operate largely in the North of England but have carried out work as far a field as Shetland to the North and Kings Lynn to the South and would be willing to consider work in most UK locations.

Recent Clients

Balfour Beatty Infrastructure, Interserve (recently completed the A66 upgrade at Long Newton, Stockton-on-Tees), Raynesway Construction Southern, Walter Thompson Ltd, York Construction, Birse Civils Ltd, North Yorkshire County Council (included in their list of approved contractors).

Equipment

All of our equipment is regularly inspected, maintained and tested to the highest standard.

CATERPILLAR 953C

CATERPILLAR 432E

CATERPILLAR 302.5

CATERPILLAR 320B

Drainage

Installation of all types and sizes of drainage, sewer connections and culverting. We are equipped and have experience to carry out works from sewer connections, storm water drain systems and pumping stations (further information available on our website: www.blakeycivilengineering.co.uk)
